Election

Applicants hereby confirm the election of Group III, claims 18-23. Accordingly, claims 1, 2, 11-15, 24-26 and 28 are canceled and Claims 16-17 and 27 are withdrawn from consideration.

Rejection Under 35 USC §103

The Examiner rejects claims 18-23 under 35 U.S.C. 103 as being unpatentable over US 5,658,651 to Smith et al. (hereinafter "Smith"). The Examiner states that Smith teaches a fabric treatment and softener system for in-dryer use. The system comprises a textile sheet impregnated with a fabric treatment formulation, which comprises a liquid vehicle, including water, ethylene glycol, non-ionic surfactants and additional fabric treatment agents, such as shrinkage controller. The Examiner concludes that it would have been obvious to one of ordinary skill in the art to formulate a fabric treatment composition comprising ethylene glycol as solvent for use in the composition of Smith. The Examiner acknowledges that Smith does not specifically teach ethylene glycol as a shrinkage controller, but a composition containing ethylene glycol will inherently exhibit this property.

First, Applicants respectfully point out that Smith merely mentioned shrinkage controller as one of many fabric treatment agents that may be added to its composition. Smith does not provide an enabling teaching as to what material can be used as a shrinkage controller.

Second, Applicants respectfully point out that claim limitations must be viewed as a whole. Smith does not teach or suggest the presently claimed specific amounts of shrinkage reducing agent in combination with the specific amount of cleaning/refreshment composition. Thus, Smith does not render the presently claimed combination obvious.

Based on the foregoing, Applicants respectfully request reconsideration and withdrawal of the rejection.
